

LICENSE-OFFER: SPECTACLES PARASOL / SPECTACLES HAT for HER and HIM

prio patent registration: A60164/2020 on 26.05.2020

DESIGNER-CHALLENGE

Dear Sirs, Ladies and Gentlemen,

I offer you the license (international license) for development and exploitation of the SPECTACLES PARASOL / SPECTACLES HAT for HER and HIM.

SKETCH → www.kippex.at/SKETCH_Brillenschirm-Spectaclesparasol.htm

PROTOTYPE → www.kippex.at/PROTOTYPE_Brillenschirm-Spectaclesparasol.htm

STOWING-folding-rolling → www.kippex.at/FOLDING-PROTOTYPE_Brillenschirm-Spectaclesparasol.htm

Description SKETCH / PROTOTYPE / STOWING

The spectaclesparasol-hat (2/3/4/6) offers a light and airy headgear (sun protection/UV protection/weather protection) detachably attached(6) to (sun)spectacles, which between the head and the spectaclesparasol allows a distance / hissing space. → Head contact, which is often perceived as unpleasant, can thus be avoided, such as sweating, itching, feeling of pressure, etc. The use of bendable-elastic-flexible materials makes it possible to align the spectaclesparasol as desired against sunlight (Fig2/Fig3), and to stow it in a space-saving manner (in handbag-bathing bag...), for example by folding / rolling up / or pop-up systems as in beach shells - beach tents, etc.

Components made of ultralight materials

SKETCH / PROTOTYPE

1) External Framework(2)

The external framework (2) is made of pliable-elastic-flexible materials (e.g. wire, fiberglass, etc.). It can be dimensioned and shaped as desired, (e.g. circular, oval→round / rectangular→square / umbrella-roof-shaped → flat-vaulted, etc.)

2) Covering(4)

For the covering (4) of the external framework (2), weatherproof materials are used (UV-filtering / waterproof, etc.).

The covering(4) offers

a) an artistic-pictorial-picturesque design surface (print, etc.)

b) ADVERTISING SPACE + COMPANY- LOGO

c) combination of a) +b) etc.

3)Connecting arms(3)

The connecting arms (3) are made of pliable-elastic-flexible materials, (e.g. wire, fibreglass, etc.). The length can be chosen at will, with the proviso that contact with the head can be avoided. A telescopic mechanism is also an option. - The number of connecting arms can be chosen at will depending on material and stability requirements.

4) Fixing element(6)

The fixing element(6) enables an easily removable fixing-docking of the connecting arm(3) on the spectacles temple(1), for example by means of sliding, plugging, clipping, clamping, magnetic closure, velcro closure, joint, ...etc.

• **Connecting the parts**

The parts of the spectacleparasol-hat (2/3/6) are connected with each other by, soldering, welding, sliding on, plugging in, gluing, joint(s), etc.

• **Stowing-space saving** → STOWING → www.kippex.at/FOLDING-PROTOTYPE_Brillenschirm-Spectaclesparasol.htm

The spectaclesparasol - hat can be **stowed away in a space-saving way** in a handbag-bathing bag...etc. (e.g.: by folding, rolling up, or pop-up systems as in beach shells - beach tents, etc.)

- Security tape optionally

A spectacles strap or hat band can optionally serve as a safety device (e.g. from spectacles or spectaclesparasol reaching under the chin or the back of the head). - Attachment: Sliding on, clipping on, etc. as already done with safety straps for glasses.

☺ I am confident that I can offer your **designers** a **challenge** with the " spectaclesparasol-hat ", to set new accents regarding an innovative headgear for HER and HIM.

With kind regards

Anton Leitner

a.leitner@kippex.at

► Presentation market appearance:

- a) Spectaclesparasol for already existing (sun)glasses
- b) SET: Spectaclesparasol + (sun)glasses

► Price:

With low production costs, the spectaclesparasol-hat (especially beach-spectaclesparasol) should be affordable for everyone (except brand designer pieces)

► Distribution:

Commercial chains for leisure articles: Department stores / sporting goods retail / Hofer (Austria-Germany) / Lidl (Austria-Germany)

Onlineshops

Fashion houses for Designer Pieces

Tourism industry: Goody when booking / travel agencies / airlines → parasol-covering = advertising space → colourful Design + company logo
